PROFESSIONAL SUMMARY

B.E. Artificial Intelligence and Machine Learning student with hands-on experience building AI-powered applications using Python, LangChain, CrewAI, and Streamlit. Skilled in NLP, LLM-based workflows, prompt engineering, and full-stack development with React and Node.js. Delivered projects spanning legal contract analysis, resume parsing, and multi-agent AI systems. Strengthening Data Structures & Algorithms and core CS fundamentals while pursuing an entry-level role in AI/ML Engineering or Software Development.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL, JavaScript

Web Technologies: HTML, CSS, React, TypeScript, Node.js

AI & Machine Learning: Machine Learning, NLP, LangChain, CrewAI, LLM Application Development, Prompt Engineering, Multi-Agent Systems, RAG (Retrieval-Augmented Generation)

Computer Science Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Developer Tools: Git, GitHub, VS Code, Vercel, Streamlit, PDF Parsing

EDUCATION

B.E. – Artificial Intelligence and Machine Learning

2023 – Present

V.S.B. Engineering College, Karur | CGPA: 7.8

Relevant Coursework: Machine Learning, Artificial Intelligence, Deep Learning, NLP, Data Structures & Algorithms, OOP, Operating Systems, DBMS

EXPERIENCE

AI/ML & Web Development Intern — Emglitz Technologies, Coimbatore Jun 2024 – Jul 2024 | Dec 2025 – Jan 2026

- Built a Grocery Management System web interface using HTML, CSS, and JavaScript.
- Trained a Malaria Detection model in Python, applying image preprocessing and classification techniques.
- Contributed to VisionNet, a multi-object recognition project built with deep learning.
- Gained hands-on experience across data preparation, model training, and testing across both internship stints.

PROJECTS

ClauseAI – Multi-Agent System for Legal Contract Analysis

Tools: Python | LangChain / CrewAI | Prompt Engineering

- Built a multi-agent system using CrewAI to break down and analyze sections of legal contracts.
- Designed an orchestrator agent to route tasks — termination, indemnity, jurisdiction — to the right sub-agent.
- Implemented agent memory so later sections could reference earlier contract context.
- Converted raw contract text into structured outputs with flagged risks and key obligations.

AI Resume Analyzer

Tools: Python | Streamlit | NLP | PDF Parsing

- Built a resume parser that extracts candidate details — skills, education, experience — from uploaded PDFs.
- Applied NLP techniques to process and categorize extracted text into structured sections.
- Developed a Streamlit app enabling users to upload a resume and view results instantly, with no setup.
- Organized output for clear, side-by-side comparison across candidates.

SOFT SKILLS

Problem Solving | Analytical Thinking | Communication | Teamwork | Leadership | Adaptability | Time Management | Continuous Learning

ADDITIONAL INFORMATION

Languages: Tamil, English

Practice: Actively solving Data Structures & Algorithms problems on LeetCode

Interests: Practical AI application development, full-stack software engineering
